## Contents

<b>1</b>	<b>Planning, Navigation and Localization of Mobile Robots . . . . .</b>	<b>9</b>
1.1	Introduction . . . . .	9
1.2	Planning: Geometric methods. Bug algorithms . . . . .	9
1.3	Planning: Potential functions . . . . .	11
1.4	Planning: Topological Roadmaps . . . . .	12
1.4.1	Visibility graphs . . . . .	12
1.4.2	Voronoi Diagrams . . . . .	13
1.4.3	Silhouette Methods . . . . .	14
1.5	Planning: Cell Decompositions . . . . .	15
1.5.1	Trapezoidal decomposition . . . . .	15
1.5.2	Morse Decompositions . . . . .	15
1.6	Planning: Probabilistic Planners . . . . .	16
1.6.1	Probabilistic Roadmap Planner (PRM) . . . . .	16
1.6.2	Expansive-Space Tree (EST) . . . . .	17
1.6.3	Rapidly-Exploring Random Tree (RRT) . . . . .	18
1.7	Localization: Kalman and Bayesian Filtration . . . . .	19
1.7.1	Linear Kalman Filter . . . . .	19
1.7.2	Bayesian Filtration . . . . .	21
<b>2</b>	<b>Planning and Navigation for Teams of Robots . . . . .</b>	<b>23</b>
2.1	Introduction . . . . .	23
2.2	Selected approaches to planning and navigation for many robot systems from literature . . . . .	26
2.2.1	Behavior-based approach . . . . .	27
2.2.2	Potential field approach . . . . .	29
2.2.3	Metric approach . . . . .	31
2.3	Formation control . . . . .	32

VI      Contents

2.4	Planning for multirobot systems . . . . .	33
<b>3</b>	<b>Spatial Reasoning</b> . . . . .	37
3.1	Introduction . . . . .	37
3.2	Mereology of Lesniewski . . . . .	39
3.3	Mereology based on connection . . . . .	41
3.4	A variant of Whitehead-Clarke connection calculus: RCC calculus . . . . .	43
<b>4</b>	<b>Spatial Reasoning Based on Rough Mereology</b> . . . . .	47
4.1	Introduction . . . . .	47
4.2	Rough mereology . . . . .	49
4.3	Mereogeometry . . . . .	51
4.3.1	Betweenness: the Tarski definition . . . . .	51
4.3.2	Nearness: the vanBenthem definition . . . . .	51
4.3.3	Betweenness: the vanBenthem definition . . . . .	52
4.3.4	Betweenness for regular rectangles and mobile robots . . . . .	52
<b>5</b>	<b>Mereological Potential Field Planner</b> . . . . .	57
5.1	Parameters of the Model of Mereological Potential Field . . . . .	58
5.2	The Mereological Path Planner . . . . .	58
5.3	<i>SQUARE_FILL_ALGORITHM</i> . . . . .	60
5.4	Path Planning: <i>PATH_SEARCH_ALGORITHM</i> . . . . .	63
5.5	Implementation in Player/Stage Robotics Framework . . . . .	63
5.6	A Comparison with Player's Built-in Path Planning Device . . . . .	68
<b>6</b>	<b>Planning and Navigation with Formations of Robots</b> . . . . .	73
6.1	A definition of a formation . . . . .	73
6.1.1	On complexity of formation description . . . . .	75
6.1.2	A language for describing formations . . . . .	76
<b>7</b>	<b>Player/Stage Robotics Software Framework</b> . . . . .	81
7.1	Introduction. Why Player/Stage? . . . . .	81
7.1.1	Licensing . . . . .	81
7.1.2	Portability . . . . .	81
7.1.3	Scalability . . . . .	82
7.1.4	Good communication with developers . . . . .	82
7.2	System overview . . . . .	82
7.3	Client - server architecture . . . . .	83
7.4	Middleware . . . . .	84

7.5	Interfaces . . . . .	85
7.6	Server-side drivers . . . . .	90
7.6.1	Robotics hardware drivers . . . . .	90
7.6.2	Data processing drivers . . . . .	91
7.6.3	Stage plug-in . . . . .	94
7.6.4	Writing new plug-ins . . . . .	96
7.7	Running Player server . . . . .	102
7.7.1	Installation process . . . . .	102
7.7.2	Command line parameters . . . . .	103
7.7.3	Player server configuration file . . . . .	104
7.8	Client-side applications . . . . .	106
7.8.1	Client-site programs shipped with Player distribution . . . . .	106
7.8.2	Client-side API . . . . .	107
7.9	Our contribution to Player/Stage project . . . . .	112
7.9.1	Improvements . . . . .	112
7.9.2	New drivers . . . . .	113
7.9.3	Client programs . . . . .	116
7.9.4	Library of C-language functions for WKB geometries processing (OpenGIS, 1999) . . . . .	117
7.9.5	<i>videout</i> and <i>videout-i420</i> - integration with <i>gstreamer</i> middleware . . . . .	118
8	<b>GIS Software</b> . . . . .	121
8.1	Introduction . . . . .	121
8.2	Geographic Information Systems . . . . .	121
8.2.1	GIS functionality . . . . .	121
8.3	PostGIS and PostgreSQL database server . . . . .	122
8.4	uDig: desktop GIS data access . . . . .	127
9	<b>Formation Control in Player</b> . . . . .	135
9.1	Drivers for Player server to arrange and maintain formations . . . . .	135
9.1.1	Formation controller . . . . .	135
9.1.2	Three Methods of Formation Repairing . . . . .	137
9.1.3	Method 1: Pure behavioral . . . . .	137
9.1.4	Method 2: One robot at a time . . . . .	141
9.1.5	Method 3: All robots at a time . . . . .	144
9.1.6	Navigation by obstacles with robot formations: Formation changing and repairing . . . . .	145
